**Indian Library Science Abstracts [ILSA] -
Volume 45-49 (2011-2015) - Recently Published**

Indian Library Science Abstracts (ILSA), being brought out by IASLIC since 1967, is the only national abstracting and indexing journal of India in the field of library and information Science. Due to the phenomenal growth of LIS literature in India in English as well as regional languages and the lack of volunteer professionals it has become a herculean task to collect, organize and compile data for the ILSA. The last cumulative volume (Vols. 40-44, 2006-2010) was published in 2018, the print copies as well as e-copies (in CD) of which are available for sale at IASLIC Office.

ILSA Volumes: 45-49 (2011-2015) published in July, 2023. The volume consists of 1365 entries from 17 journals and 6 conference proceedings. Complete bibliographical description of the abstracted document as furnished in the source journal has been provided in order to facilitate the users to identify the document. The volume consists of two parts: Main or Classified Part and Index Part. Entries in the main/classified part are primarily arranged according to the classified order by adopting 22nd ed. of DDC.

We humbly acknowledge the patronage of the honourable members of the Editorial Board. We also gratefully acknowledge commercial and academic publishers, LIS schools, research institutes, professional associations, library and information science professionals for their encouragement and support in getting data from various sources distributed in different states of India.

The team hopes that ILSA will be an authentic and comprehensive surrogate of Indian intellectual output in Library and Information Science.

Snapshots of some pages of the **ILSA Volume 45-49 (2011-2015) is available in the IASLIC website**. The hard copy and soft copy will be available from IASLIC Office. **The Price of Print version is Rs. 2500/- and e-version is Rs. 500/-**. For any query, please mail to: iaslic.india@gmail.com.

PLANNER: A National Convention for North Eastern Region

12th Convention PLANNER 2024 is being organized by INFLIBNET Centre, Gandhinagar at Rajiv Gandhi University, Arunachal Pradesh from September 19-21, 2024.

About the Conference

Promotion of Library Automation and Networking in North-Eastern Region (PLANNER) is a bi-annual convention with a special focus to uplift academic libraries in the North-Eastern region, India in the aspect of library automation and networking. The event is organized by INFLIBNET Centre along with the universities located in the respective North-Eastern States. PLANNER 2024 is being organized by INFLIBNET Centre in collaboration with Rajiv Gandhi University, Itanagar, Arunachal Pradesh during September 19-21, 2024 at Rajiv Gandhi University, Itanagar, Arunachal Pradesh.

The objective of the convention is to address the modern tools and techniques that have manifested in the form of ICT applications which had made an impact in today's library management and services. It is evident that these disruptive innovations relentlessly moves up the preferred to-do list for librarians in view of their inherent characteristics of being readily adopted, adapted and evolving into new scenarios eventually displacing established procedures and techniques. In the entire process, while issues and challenges are visible, solutions too are expected as an outcome of the deliberations. It is also envisaged that the convention will not only further promote library automation and networking in North-Eastern states of India but will be an opportunity for the LIS professionals of North-Eastern states of India along with other participants to address the aforesaid issues and acquire new skills and techniques, in the process.

UNESCO Guidelines for the Governance of Digital Platforms

UNESCO has released its Guidelines for the Governance of Digital Platforms, the result of a year's work involving a wide variety of stakeholders, including the Internet4Trust conference in February which attracted over 4000 participants. The final version of UNESCO's guidelines on how digital platforms – and in particular social media – should work offers helpful affirmation of the importance of access to information, skills, and libraries. It also provides a framework for us to engage in wider debates about information regulation. At the heart of the Guidelines there are a set of five principles. These are:

1. Platforms should conduct human rights due diligence – this should take place in general and before any major changes, and incorporate a full variety of perspectives.
2. Platforms should adhere to international human rights standards, including in platform design, content moderation and content curation – this should involve non-discrimination by design, moderation in local languages (as well as support for moderators, who otherwise can have a terrible job), a variety of responses to harmful content, auditing processes, avoiding promoting content that would generally be seen as illegal.
3. Platforms should be transparent – crucial to achieving the above is transparency, both in terms of setting out terms of service, and showing clearly how platforms comply with

them. This covers everything from moderation, advertising, complaints and appeals, safeguards for freedom of expression, and ensuring access to data for researchers, civil society and media

4. Platforms should make information and tools available for users – this refers to ensuring that users understand processes and their rights, in particular in their own language.
5. Platforms should be accountable to relevant stakeholders – there should be effective complaints mechanisms that take account of local needs.
